

Licencing Rounds

Trust us with your data

There are tens of Licencing Rounds around the world each year. How can you compete with others and make yours a success? We support national oil companies and governments in their constant search for investors. Let us help you to stand out.

- **Let your data work for you**

Don't keep your G&G data in a drawer. Let us build and run your virtual exploration database to spark more interest from potential investors to your region. It will save you time and effort needed to guide investors through a physical data room. Well selected and properly provided data will make the review more efficient and attractive!

- **Save time and effort**

A Licencing Round is a complex process. You don't have to do everything by yourself. We offer data collection and preparation, project management, data showcasing and virtual and physical data room management, marketing services, technical review of applications and communication services. Everything you need to make your Licencing Round a success!

- **Increase your chances for success**

Through our HydrocarbonAssets™ range of marketing services we can attract more companies to your Licencing Round and assist you in secure sharing of geotechnical and commercial information with them. We provide analytical tools to distinguish who is really interested in your project and who is not. Speed, efficiency and attention to detail are qualities that have earned us an excellent reputation.

Check what our Clients say about us!

"Working with Zebra Data Sciences on our 2018 Licence Round has been a great experience. The team at Zebra Data was very efficient and helpful with both the project set-up and day to day operational management and communication. SNOC would highly recommend their services."

Mark Sarssam, Senior Advisor E&P,
Sharjah National Oil Corporation

Our technology

With our new, enhanced EzDataRoom® Web GeoReality™ system, your Licencing Round or repository data can be exhibited on the Web in 3D and Virtual Reality giving an unprecedented dimension to the way in which your campaign is projected to the world!

Our experience

Over the last 10 years we have supported 18 Licencing Rounds around the world. Our involvement significantly increased the number of participating companies. We have organized and hosted EzDataRoom Web and EzDataRoom Remote for Licencing Rounds in Malaysia, Canada, Trinidad and Tobago, Sharjah, Faroe Islands, Philippines, Poland, Suriname and Chad. We are the only company approved to provide G&G showcasing services for companies with assets in Indonesia and Malaysia. Contact us to find out what we can do for you!

"I express my deepest gratitude to Zebra Data Sciences for their invaluable contribution to make the Fourth Philippine Energy Contracting Round a success. The licensing round of 15 exploration blocks in the Philippines has required Zebra to perform the daunting task of preparing thousands of documents for the creation of digital data packages. Zebra has without any complaints, professionally digitised the same in record time and has also actively promoted the PECR4 to all members of their database which attracted petroleum companies worldwide. We have no hesitation in recommending their services and we look forward to working with Zebra again in the near future."

Jose M. Layug Jr., Undersecretary,
Department of Energy, Philippines

"During our 4th Licensing Round Jarðfeingi (Faroese Geological Survey) has given interested parties access to view the released seismic and well data, as well as different research reports, via EzDataRoom provided by Zebra Data. We are very satisfied with the interest we got from the investors, especially because the Faroese area is still largely under-explored compared to our neighbours."

Jana Ólavsdóttir B.Sc. M.Sc. Ph.D. in geology,
Jarðgeingi
